Wavemaster Custom Wood Veneer High Performance

Wavemasters custom wood veneer sets the trend in wave ski surfing. The custom is designed to suit your requirements. Whether you are looking at the Rolls Royce in performance or a lighter variation of what you are presently riding. Wavemasters custom is state of the art.

The Wavemaster custom brings all the good points you're looking for together plus more. The Wavemaster custom is by far the most durable custom ski on the market. If you are looking at a long term commitment with your ski or simply looking for the best in design a Wavemaster Custom has to be the option.

Wavemasters commitment in epoxy technology combines the cutting edge of design and strength with the ultimate in vacuum bag forming second to none.

Wavemasters custom waveskis are hand shaped to your individual requirements and vacuum bagged to Wavemasters stringent export quality standards. The result is a highly tuned and finished custom ski which will do what you require. Our performance record speaks for itself. Proven winner with World and Australian Titles.

CONSTRUCTION

The very latest in technology and materials, Wavemasters revolutionary vacuum formed wood veneer cusdtoms. This process gives a very strong and durable finish to the hand shaped custom, by pulling the veneer and glass down under high vacuum pressure over the hand shaped styrene blank. All excess resin is pulled through the glass and wood layer over a curing period making the finished product very light and strong, also eliminating pin holes and delamination to form a rock hard finish in wood veneer. Colour is then applied using acrylic paint with a flat pro finish.
