Wavemaster Nipper Board Surf Life Saving Australia Approved

Wavemasters Nipper boards come in a wide variety of shapes and colours. All Wavemaster Nipper boards are individually shaped to suit your height and weight.

Wavemaster nipper boards are based around current designs and are very strong and reliable. All Wavemaster nipper boards are a vacuum bag construction which is a great choice for club boards or if you are looking for a strong board to be used at club level. All Wavemaster nipper boards come standard with dual handles (front and back) and a centre fin box in bottom with fin.

Construction

The very latest in technology and materials, Wavemasters revolutionary vacuum formed wood veneer epoxy nipper boards. This process gives a very strong and durable finish to the hand shaped nipper board, by pulling the veneer and glass down under high vacuum pressure over the handshaped styrene blank. All excess resin is pulled through the glass and wood layer over a curing period making the finished product very light and strong, also eliminating pin holes and delamination's to form a rock hard finish in wood veneer. Colour is then applied using acrylic paint to give a high shine which is very hard wearing and durable under UV rays.

SPECS

LENGTH	APPROX WIDTH	APPROX WEIGHT	RECOMMENDED WEIGHT	RECOMMENDED PERFORMANCE
