WAVEMASTER STRATA RANGE INTERMEDIATE TO HIGH PERFORMANCE

Wavemaster Strata Range is designed for high performance surf work. The Strata comes in a 2.5 model only and will carry up to 110kg. This model features Wavemasters step nose (A proven contest winner)

The Strata is designed for high performance surfing, however a confident intermediate rider would be capable of riding the strata due to its stability features. Some key points to look at on the strata are;

- Wavemasters adjusta block which lets the rider position perfectly Example legs/seating
- Nose lift- ease of paddling through white water, excellent in cutback turns and late take offs.
- Strata's rail line is very fine increasing manoeuvrability in tight turns and making trimming on a wave a lot more controlled. A tight edge running through the tail to give maximum hold in tight sections and on tubing type waves
- Strata's deck profile is rolled and contoured for strength and blended with a clean type plan shape.

Standard Features Include

- Adjusta block with deluxe adjustable foot straps
 - Deluxe Belt
 - Seat Pad
 - Tri fins

Construction

Wavemaster Strata is constructed from the very latest in fibreglass technology using combination high grade materials including fibreglass cloth, Matts and vinyl ester resins. Wavemasters strata is hand laminated to ensure maximum strength to weight ratios for lightness and strength. Wavemasters 2 phase foaming techniques is used to fill the ski with high density foam to form a solid unit.
